"Ferric-coprogen receptor Flub of Bscherichia coll: processing and "Ferric-common to all TonB-dependent outer membrane receptor

    J. Bacteriol. 169:2044-2049(1987).
    -1- FUNCTION: REQUIRED FOR THE UPTAKE OF IRON(III) VIA COPROGEN, FERRICXAMINE B, AND RHODOTORUILC ACID.
    -1- SUBCELLULAR LOCATION: Outer membrane.
    -1- INDUCTION: FOR INDUCTION THE TONB AND THE EXBB PROTEIN HAVE TO BE ACTIVE.

Norgard M.V., Radolf J.R., Hansen E.J.,

A hemoglobin-binding outer membrane protein is involved in virulence expression by Haemophilus ducreyi in an animal model.";

Infect. Immun. 64:1734-1735(1956).

-I FUNCTION: ACTS AS A RECEPTOR FOR HEMOGLOBIN OR THE HEMOGLOBIN/HAPTOGLOBIN COMPLEX OF THE HOST AND IS REQUIRED FOR HEMOGLOBIN/HAPTOGLOBIN COMPLEX OF THE HOST AND IS REQUIRED FOR HEME UPTAKE. MAY BE INVOLVED IN VIRULENCE.

-I SUBJECTIVILAR LOCATION: Outer membrane.

-I SIMILARITY: BELONGS TO THE TONB-DEPENDENT RECEPTOR PROTEIN FAMILY;

HEMOGLOBIN/HAPTOGLOBIN BINDING PROTEIN SUBFAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          64 QDSRDLVRYETGVTV-----VEKGRFGSSGYAIRGVDENRVAVVVDGLHQAETISSQG 116

"Massive gene decay in the leprosy bacillus.";
Nature 409:1007-1011(2001).
--- FUNCTION: THIS PROTEIN CATALYZES THE FORMATION OF PHOSPHODIESTER
LINKAGES BETWEEN 5'-PHOSPHORYL AND 3'-HYDROXYL GROUPS IN DOUBLE-
STRANDED DNA USING NAD AS A COENZYME AND AS THE BRERGY SOURCE FOR
THE REACTION. IT IS ESSENTIAL FOR DNA REPLICATION AND REPAIR OF
DAMAGED DNA (BY SIMILARITY).
--- CATALYTIC ACTIVITY: NAD(+) + (deoxyribonucleotide)(N) +
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
